JavaScript, TypeScript, Python

PROJECTS

HomeTales ([See Project](#))

- **HomeTales** is a real-estate startup based in Netherland that plans on **revamping the much-static real estate market into a dynamic space** that is run by actual people. The initiative is more like a social network platform where users and professionals meet each other to close deals.

Klimates ([See Project](#))

- **Klimates** is a **Climate Action** Platform empowering businesses and Individuals to **fight climate change**. It closes the gap between Climate Intent and Climate Action.

EXPERIENCE
